

myEvolv® 2014 Certified Edition

Netsmart has available multiple EHR solutions that are certified under the Office of the National Coordinator (ONC) for Health Information Technology (HIT). Below is a list of Netsmart certified Health IT solutions, any product limitations, and types of cost information.

I. Disclaimer

The Health IT Modules listed in this document are 2014 Edition compliant and have been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services.

II. Certified EHR & Vendor Information

Additional software used	None

III. Costs and Limitations

All measures Tested

Types of cost:

An initial license of myAvatar is required as well as on-going yearly maintenance costs. There is also a one-time implementation fee for the capabilities required for criteria outlined in this document.

170.314(a)(1) CPOE – Medications, 170.314 (a)(2) – Drug-drug, drug-allergy interactions checks, 170.314 (a)(6) Medication List, 170.314 (b)(3) – Electronic prescribing

Types of Costs

A recurring subscription is required per prescriber or agent.

Limitations

No technical or practical limitations

170.314 (a)(8) – Clinical Decision Support, 170.314 (e)(1) – View, Download and Transmit to 3rd Party, 170.314 (e)(3) – Secure Messaging, 170.314 (g)(2) – Automated Measure Calculation, 170.315 (b)(1) – Transitions of care, 170.314 (c)(1-3) – Clinical Quality Measures

Types of Cost:

A recurring subscription is required. Additionally, clients may be required to purchase an additional server to provide the web service capabilities required for these pieces of functionality to be enabled. Additionally, an SSL certificate for external communications must be purchased to enable the capabilities outlined.

In many instances, clients may have already accounted for this based on other solutions they have enabled outside of those required for meaningful use. In those scenarios, no additional servers or certificates are required.

For clients who are hosted by Netsmart Technologies, no additional certificates or hardware is required. All of these are guided in their contract that they sign with Netsmart.

Limitations:

Each connection point is configured by Netsmart as part of the MU Certified solution. Clients select the number and types of connections they require to outside organizations. All HIEs / point to point connections for referrals / laboratories and registries for example are identified on the contract. As part of the implementation all of these are configured by Netsmart.
