Plan Report ID Number: [For ONC-Authorized Certification Body use only]

Developer Name: Netsmart

Product Name(s): myUnity Senior Living

Version Number(s): 2023

Certified Health IT Product List (CHPL) ID(s): 15.04.04.2816.Myun.01.00.0.230525

Developer Real World Testing Page URL: <https://www.ntst.com/lp/certifications>

Justification for Real World Testing Approach

At this time, the myUnity Senior Living product is marketed toward Post-Acute Care and specialty care settings including Senior Living. For this reason, the myUnity Senior Living Real World Testing plan will apply to this specialty care setting. myUnity Senior Living is certified to a wide variety of Real World Testing (RWT) criteria. Netsmart identified use cases and measures for the criteria the myUnity Senior Living product is certified to which falls within the RWT scope.

The following care coordination criteria will be tested, §170.315(b)(10) – Electronic Health Information Export. The product also supports the public health criteria, §170.315(f)(1) – Transmission to Immunization Registries.

Standards Updates (SVAP and USCDI)

The Netsmart myUnity Senior Living certified product is not and has not participated in the Standards Version Advancement Process prior to August 31, 2024. The myUnity Senior Living certified product updated to the new United States Core Data for Interoperability (USCDI) version 1 for the related criteria in accordance with the Office of National Coordinator (ONC) timeline, and 21st Century Cures Act by December 31, 2023.

Standard (and version)	All standards are those specified for the standard criteria.
Updated certification criteria and associated product	Not applicable
CHPL Product Number	Not applicable

Method used for standard Update	Not applicable
Date of ONC-ACB notification	Not applicable
Date of customer notification (SVAP only)	Not applicable
Conformance measure	Not applicable
USCDI updated certification (USCDI version)	Version 1

Care Setting(s)

myUnity Senior Living supports the deployment and tracking of documentation within and outside of the Senior Living health care specialty setting. The majority of clients using certified technology are doing so in inpatient settings.

Overall Expected Outcomes

Real World Testing will demonstrate that myUnity Senior Living is conformant to the following certification criteria:

- §170.315(b)(10) – Electronic Health Information Export
- §170.315(f)(1) – Transmission to Immunization Registries
- §170.315(f)(5) – Transmission to Public Health Agencies - Electronic Case Reporting

Schedule of Key Milestones

Key Milestones	Date/Timeframe
Submit Real World Testing Plan documentation to Drummond.	November 1, 2024
Begin Collection of information as laid out by the plan for the period.	January 1, 2025
Follow-up with providers and authorized representatives on a regular basis to understand any issues arising with the data collection.	Quarterly, 2025
End of Real-World Testing period/final collection of all data for analysis.	December 31, 2025
Analysis and report creation.	January 15, 2026
Submit Real World Testing report to ACB (per their instructions)	February 1, 2026

Measures Used in Overall Approach

§170.315(b)(10) – Electronic Health Information Export

Description of Measurement/Metric

The following measures will demonstrate the ability to create electronic health information export files.

- Number of single patient electronic health information exports.
- Number of patient population electronic health information exports.

Associated Certification Criteria

§ 170.315 (b)(10) Electronic Health Information Export	§170.315(b)(10)(i)
	§170.315(b)(10)(ii)
	§170.315(b)(10)(iii)

Justification for Selected Measurement/Metric

The measurements selected demonstrate that single patient and patient population electronic health information exports can be successfully generated. This measure will provide information on the volume of exports created, and the breadth of our client base utilizing this functionality.

Test Methodology

Internal monitoring tools will provide utilization over the specified time period.

Care Setting(s)

Care Setting	Justification
Senior Living care specialty setting	This measure was designed to test the Senior Living health care facilities we support and target with this certified product. We will pull date to test over a 12 month period

Expected Outcomes

It is expected that End Users will be able generate single patient and patient population electronic health information export files for selected patients over a specified date range.

§170.315(f)(1) – Transmission to Immunization Registries

Description of Measurement/Metric

This measure will demonstrate the ability to transmit data to immunization registries as required for compliance purposes.

- Numerator: Number of distinct immunization records in the denominator that sent recorded immunizations to an immunization registry.
- Denominator: Number of distinct immunization records in a given month period.

Associated Certification Criteria

§ 170.315 (f)(1) Transmission to Immunization Registries	§170.315(f)(1)(i)
	§170.315(f)(1)(ii)

Justification for selected Measurement/Metric

This measure will provide information on the number of patients within a client’s facility whose information is being sent to an immunization registry.

Test Methodology

The denominator will pull directly from the client database based on the parameters identified. The numerator will come from CareConnect tool which facilitates the connection between the EHR and Immunization registry.

Care Setting(s)

Care Setting	Justification
Senior Living care specialty setting	This measure was designed to test the Senior Living care facilities we support and target with this certified product. We will pull data to test over a 12-month time period.

Expected Outcomes

The identified measure will document the percentage of patients at the facility with immunization records being sent to an immunization registry.

§170.315(f)(5) – Transmission to Public Health Agencies - Electronic Case Reporting

Description of Measurement/Metric

The measure will demonstrate the ability to send electronic case reports to public health agencies.

- Number of CCDs transmitted to AIMS in a given month period

Associated Certification Criteria

§ 170.315 (f)(5) Transmission to public health agencies –electronic case reporting	§170.315(f)(5)
--	----------------

Justification for Selected Measurement/Metric

There are no clients on the myUnity Senior Living certified product sending data to public health agencies for electronic case reporting. For this reason, we will be using testing tools to demonstrate that the capability is present should a client opt to begin sending data to public health agencies.

Test Methodology

We will utilize the AIMS platform to demonstrate our compliance with the certification criteria. And to demonstrate clients have a functioning ability to send electronic case reports to public health agencies should they opt to do so in the future.

Care Setting(s)

Care Setting	Justification
Senior Living care specialty setting	This measure was designed to test the Senior Living care facilities we support and target with this certified product. Testing tools will be utilized to demonstrate compliance.

Expected Outcomes

The measure and use of testing tools will demonstrate compliance with the criteria and the ability to send data should a client ever opt to do so.

Attestation

This Real World Testing plan is complete with all required elements, including measures that address all certification criteria and care settings. All information in this plan is up to date and fully addresses the Health IT Developer's Real World Testing requirements.
