General Information

Plan Report ID Number: [For ONC-Authorized Certification Body use only]

Developer Name: Netsmart

Product Name(s): TheraOffice

Version Number(s): 14.1

Certified Health IT Product List (CHPL) ID(s): 15.04.04.2816.Ther.14.00.1.240628

Developer Real World Testing Page URL: <https://www.ntst.com/lp/certifications>

Justification for Real World Testing Approach

At this time, the TheraOffice product is marketed toward Post-Acute Care and specialty care settings including Palliative. For this reason, the TheraOffice Real World Testing plan will apply to this specialty care setting. TheraOffice is certified to a wide variety of Real World Testing (RWT) criteria. Netsmart identified use cases and measures for the criteria the TheraOffice product is certified to which falls within the RWT scope.

The following care coordination criteria will be tested, §170.315(b)(1) Transitions of care, §170.315(b)(2) Clinical information reconciliation and incorporation, §170.315(b)(3) Electronic Prescribing, §170.315(b)(10) – Electronic Health Information Export. Additionally, the product is certified to the applicable clinical quality measures § 170.315(c)(1)-(3) and will test those. The product does support the patient engagement criteria § 170.315(e)(1) View, download, and transmit to 3rd party. The product does support the public health criteria, §170.315(f)(1) – Transmission to Immunization Registries and Transmission to public health agencies — syndromic surveillance and § 170.315(f)(5) Transmission to public health agencies – electronic case reporting. Lastly, the product will include measures for the following Application Programming Interfaces (APIs) criteria §170.315(g)(7) Application access — patient selection §170.315(g)(9) Application access — all data request, §170.315(g)(10) Standardized API for patient and population services, as well as the electronic exchange criteria § 170.315(h)(1) Direct project.

Standards Updates (SVAP and USCDI)

The Netsmart TheraOffice certified product is not and has not participated in the Standards Version Advancement Process prior to August 31, 2024. The TheraOffice certified product updated to the new United States Core Data for Interoperability (USCDI) version 1 for the related criteria in accordance with the Office of National Coordinator (ONC) timeline, and 21st Century Cures Act by December 31, 2022.

Standard (and version)	All standards are those specified for the standard criteria.
Updated certification criteria and associated product	Not applicable
CHPL Product Number	Not applicable
Method used for standard Update	Not applicable
Date of ONC-ACB notification	Not applicable
Date of customer notification (SVAP only)	Not applicable
Conformance measure	Not applicable
USCDI updated certification (USCDI version)	Version 1

Care Setting(s)

TheraOffice supports the deployment and tracking of documentation within and outside of the physical therapy, occupational therapy and speech language pathologist setting. The majority of clients using certified technology are doing so in outpatient settings

Overall Expected Outcomes

Real World Testing will demonstrate that TheraOffice is conformant to the following certification criteria:

- §170.315(b)(1) – Transitions of Care
- §170.315(b)(2) – Clinical Information Reconciliation and Incorporation
- §170.315(b)(3) – Electronic Prescribing
- §170.315(b)(10) – Electronic Health Information Export
- §170.315(c)(1) – Clinical Quality Measures (CQMs) – Record and Export

- §170.315(c)(2) – Clinical Quality Measures (CQMs) – Import and Calculate
- §170.315(c)(3) – Clinical Quality Measures (CQMs) – Report
- §170.315(e)(1) – View, Download, and Transmit to 3rd Party
- §170.315(f)(1) – Transmission to Immunization Registries
- §170.315(f)(5) – Transmission to public health agencies — electronic case reporting
- §170.315(g)(7) – Application Access – Patient Selection
- §170.315(g)(9) – Application Access – All Data Request
- §170.315(g)(10) Standardized API for patient and population services
- §170.315(h)(1) – Direct Project

Relied Upon or Third Party Software

TheraOffice relies on MedAllies Direct Solutions for its (b)(1) transitions of care certification. TheraOffice also relies on MyHealthPoint for its (e)(1) view, download and transmit 3rd party certification.

Schedule of Key Milestones

Key Milestones	Date/Timeframe
Submit Real World Testing Plan documentation to Drummond.	November 1, 2024
Begin Collection of information as laid out by the plan for the period.	January 1, 2025
Follow-up with providers and authorized representatives on a regular basis to understand any issues arising with the data collection.	Quarterly, 2025
End of Real-World Testing period/final collection of all data for analysis.	December 31, 2025
Analysis and report creation.	January 15, 2026
Submit Real World Testing report to ACB (per their instructions)	February 1, 2026

Measures Used in Overall Approach

§170.315(b)(1) – Transitions of Care

Description of Measurement/Metric

The following measures will demonstrate the ability to send and receive transitions of care/referral summaries across multiple protocols and/or networks.

- Number of XDR/XDM referral messages sent within a 30-day period. (CareConnect Inbox)
- Number of XDR/XDM referral messages received within a 30-day period. (CareConnect Inbox)
- Number of successful CCD retrievals from external organizations within a 30-day period. (Carequality)
- Number of successful CCDs provided to external organizations within a 30-day period. (Carequality)

Associated Certification Criteria

§170.315(b)(1) Transitions of Care	§170.315(b)(1)(i)(A)
	§170.315(b)(1)(i)(B)

Justification for Selected Measurement/Metric

The measurements selected demonstrate that referral messages can successfully be exchanged with external organizations using XDR/XDM direct messages. The measurements also show that an organization may successfully exchange CCDs upon request utilizing the Carequality network.

Test Methodology

Logs will be reviewed to determine the frequency and the transport mechanism used by providers for sending/receiving transitions of care using Edge protocols. Log files obtained during Real World Testing will be de-identified and used for analysis in several areas to validate the proper operation of the transport mechanisms and input for the calculation of the measure on the specific types of transport mechanisms used. This test methodology will primarily test the conformance of the implementation.

Care Setting(s)

Care Setting	Justification
Out patient therapy	This measure was designed to test the Palliative health care facilities we support and target with this certified product. We will pull data to test over a 30-day time period.

Expected Outcomes

It is expected that providers and patients (or their authorized representatives) will be able to share EHI using the transmission mechanisms provided. Error rates will be tracked and trended over time.

§170.315(b)(2) – Clinical Information Reconciliation and Incorporation**Description of Measurement/Metric**

The measure will demonstrate the certified products ability to capture, reconcile, and incorporate clinical information within the client systems as needed.

- Numerator: Number of Clinical Reconciliations completed
- Denominator: Number of unique Patients with a completed Clinical Reconciliation

Associated Certification Criteria

§ 170.315 (b)(2) Clinical information and reconciliation and incorporation	§ 170.315 (b)(2)(i)
	§ 170.315 (b)(2)(iii)

Justification for Selected Measurement/Metric

Clinical Information Reconciliation may be completed multiple times in a given period on a single patient. This measure will demonstrate the volume from both an end-user perspective (Numerator), and a Patient perspective (Denominator).

Test Methodology

Our platform utilizes a centralized platform for these transactions, with logging, monitoring, and reporting capabilities. We will be able to report on these measures from the data made available by this centralized platform.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient therapy facilities we support and target with this certified product. We will pull data to test over a 12-month time period.

Expected Outcomes

End Users will be able to utilize Clinical Information Reconciliation & Incorporation to ingest data from transitions of care/referrals.

Numerator will be larger than Denominator due to the ability to complete multiple Clinical Information Reconciliations on a single Patient in a given time period.

§170.315(b)(3) – Electronic Prescribing**Description of Measurement/Metric**

These measurements will demonstrate the ability to transmit various types of electronic prescribing (e-prescribing) functions.

- Number of e-prescriptions sent over number of e-prescriptions successfully received.
 - Numerator: # of prescriptions with a chosen output of eRx (eg, send electronically)
 - Denominator: # of prescriptions successfully sent electronically (Successfully accepted by Ultimate Receiver)
- Electronic Prescribing: Request and respond to change prescriptions
 - Numerator: # of RxChange Requests responded to (approve and deny) and sent eRx
 - Denominator: # of ChangeRx requests successfully sent electronically (RxChangeResponse)
- Electronic Prescribing: Request and respond to cancel prescriptions
 - Numerator: # of CancelRx prescriptions (eg, discontinue) with a chosen output of eRx
 - Denominator: # of CancelRx prescriptions successfully sent electronically (CancelRxResponse)
- Electronic Prescribing: Request and respond to renew prescriptions
 - Numerator: # of RxRenewal Requests responded to (approve and deny) and sent eRx
 - Denominator: # of RxRenewal requests successfully sent electronically (RxRenewalResponse)

- Electronic Prescribing: Receive fill status notifications
 - Numerator: # of RxFill status requests sent to pharmacies
 - Denominator: # of RxFill status responses received from pharmacies
- Electronic Prescribing: Request and receive medication history
 - Numerator: # of medication history requests made (RxHistoryRequest)
 - Denominator: # of medication history responses received (RxHistoryResponse)

Associated Certification Criteria

§ 170.315 (b)(3) Electronic Prescribing	§ 170.315 (b)(3)(ii)(A)(1)
	§ 170.315 (b)(3)(ii)(A)(2)
	§ 170.315 (b)(3)(ii)(A)(3)
	§ 170.315 (b)(3)(ii)(A)(4)
	§ 170.315 (b)(3)(ii)(A)(5)
	§ 170.315 (b)(3)(ii)(A)(6)

Justification for Selected Measurement/Metric

E-prescribing has been shown repeatedly to increase patient adherence to medications. As such, more and more states are requiring providers use e-prescribing. To fully receive the benefits of e-prescribing a prescriber should be able to send and receive information to and from pharmacies. This information is in the form of the proposed measures. The proposed measures will demonstrate the ability to send new prescriptions, receive renewal requests and change requests, and discontinues (cancel requests). In addition, the ability to receive a patient's medication fill history and external medication history increases medication adherence and decreases the prospect of drug overuse, abuse, and polypharmacy.

Test Methodology

After transactions are sent from our system to Surescripts (and then to the pharmacy) the Surescripts network sends messages back to our system indicating if they were or were not successful. During testing we will review our logs to ensure all prescribing transactions that are sent to the Surescripts network are successfully received. This includes transaction requests to receive Rx Fill data and Medication History.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient therapy facilities we support and target with this certified product. We will pull data to test over a 12-month time period.

Expected Outcomes

TheraOffice serves Physical Therapists, Occupational Therapists, and Speech Therapists. As such, it is not common practice for these providers to prescribe medications. Therefore, we do not anticipate any data in relation to this measure. If needed, we will utilize internal testing tools to demonstrate this functionality is available to our clients.

§170.315(b)(10) – Electronic Health Information Export**Description of Measurement/Metric**

This measure will demonstrate the end user’s ability to create export summaries on an as needed basis.

- Numerator: # of scheduled batch jobs for EHI export summaries
- Denominator: # of total EHI export summaries generated

Associated Certification Criteria

§ 170.315 (b)(10) Electronic Health Information Export	§170.315(b)(10)(i)
	§170.315(b)(10)(ii)

Justification for Selected Measurement/Metric

The measurements selected demonstrate that single patient and patient population electronic health information exports can be successfully generated. This measure will provide information on the volume of exports created, and the breadth of our client base utilizing this functionality.

Test Methodology

Internal monitoring tools will provide utilization over the specified time period.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Palliative health care facilities we support and target with this certified product. We will pull date to test over a 6 month period

Expected Outcomes

It is expected that End Users will be able generate single patient and patient population electronic health information export files for selected patients over a specified date range.

§170.315(c)(1) – Clinical Quality Measures (CQMs) – Record and Export**Description of Measurement/Metric**

This measurement will demonstrate the certified products ability to record transactions in the record

- Numerator: Number of transactions written from CareRecord
- Denominator: Number of unique CareRecord Instances that submitted transactions

Associated Certification Criteria

§ 170.315 (c)(1) Clinical Quality Measures (CQMs) – Record and Export	§170.315(c)(1)(i)
	§170.315(c)(1)(ii)

Justification for Selected Measurement/Metric

The Measures Reporting System, Care Pathways, includes two functionalities of interest: (A) Recording transactions entered into the System Under Test, and (B) calculating CQM results based on the recorded transactions. This measure will provide information on the volume of transactions recorded, and the breadth of our client base utilizing this functionality.

Test Methodology

Our platform utilizes a centralized platform for these transactions, with logging, monitoring, and reporting capabilities. We will be able to report on these measures from the data made available by this centralized platform.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient health care facilities we support and target with this certified product. We will pull data to test over a 30 day time period.

Expected Outcomes

It is expected that End Users will be able to record EHI in the System and have that data available for use in calculation of CQM Results.

§170.315(c)(2) – Clinical Quality Measures (CQMs) – Import and Calculate

Description of Measurement/Metric

This measure will demonstrate the certified product’s ability to import and calculate CQMs per patient.

- Numerator: Sum of CQMs calculated on imported patients
- Denominator: Number of unique Patients imported

Associated Certification Criteria

§ 170.315 (c)(2) Clinical Quality Measures (CQMs) – Import & Calculate	§170.315(c)(2)(i)
--	-------------------

Justification for Selected Measurement/Metric

Our Measures Reporting System, Care Pathways, utilizes an internal protocol to share information between systems, therefore it is not necessary for our system to specifically use the QRDA CAT-I file for use on a day-to-day basis. For this reason, it will be highly unlikely for one of our Clients to utilize our available QRDA CAT-I file import feature. Therefore, we will be testing using the Cypress tool, noted below in the Test Methodology section.

Test Methodology

We will utilize Cypress to generate QRDA CAT-I files for import, and generate results based on that clinical data, across multiple CQMs.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient therapy we support and target with this certified product. We will pull data to test over a 30 day time period.

Expected Outcomes

Theraoffice clients do not utilize or report on CQMs. Therefore, we do not anticipate any data will be returned or captured based on client activity. TheraOffice will utilize internal testing tools to demonstrate the client's ability to utilize the functionality, should they opt to do so.

§170.315(c)(3) – Clinical Quality Measures (CQMs) – Report**Description of Measurement/Metric**

This measure will demonstrate the ability to export the required QRDA CAT-III File on demand.

- Numerator: Number of Clients (Agencies) to export a QRDA CAT-III File
- Denominator: Number of Clients (Agencies) to generate a QRDA CAT-III File

Associated Certification Criteria

§ 170.315 (c)(3) Clinical Quality Measures (CQMs) – Report	§170.315(c)(3)(i)
Updated to 2015 edition Cures Update criteria.	§170.315(c)(3)(ii)

Justification for Selected Measurement/Metric

The Measures Reporting System, Care Pathways will generate a QRDA CAT-III file for each Certified CQM calculation, however Agencies will only download that file when the results are being utilized to upload into QPP and/or State-based portals.

Test Methodology

Internal tooling is available for monitoring and reporting QRDA CAT-III file generation and exporting, to track how many agencies are utilizing our measures on a day-to-day basis vs. when they are being used to attest with generated CAT-III files. Reporting is available to calculate this measure.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient therapy facilities we support and target with this certified product. We will pull data to test over a 30 day time period.

Expected Outcomes

Theraoffice clients do not utilize or report on CQMs. Therefore, we do not anticipate any data will be returned or captured based on client activity. TheraOffice will utilize internal testing tools to demonstrate the client's ability to utilize the functionality, should they opt to do so.

§170.315(e)(1) – View, Download, and Transmit to 3rd Party**Description of Measurement/Metric**

The measures identified will encompass the Number of Views, downloads, and transmits of patient chart summaries over number of successful views, downloads and transmits.

- View Chart summary
 - Numerator: # of views of the chart summary
 - Denominator: # of clients that had an encounter during the reporting period
- Download of chart summary
 - Numerator: # of downloads of chart summary
 - Denominator: # of clients that had an encounter during the reporting period
- Transmission of chart summary
 - Numerator: # of transmissions of chart summary
 - Denominator: # of clients that had an encounter during the reporting period

Associated Certification Criteria

§ 170.315 (e)(1) View, Download, and Transmit to 3rd Party	§170.315(e)(i)(A)
	§170.315(e)(i)(B)
	§170.315(e)(i)(C)

Justification for selected Measurement/Metric

The measurements selected demonstrate that chart summaries can successfully be viewed and downloaded by patients and that they are able to successfully transmit to external parties.

Test Methodology

We will utilize a partner product, myHealthPointe, to access data related to the ability of clients to view, download, and transmit their data to external parties. myHealthPointe, utilizes log files to capture the relevant data points.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient therapy facilities we support and target with this certified product. We will pull data to test over a 12-month time period.

Expected Outcomes

It is expected that patients (or their authorized representatives) will be able to view, download and transmit their chart summaries using the mechanisms provided. Error rates will be tracked and trended over time.

§170.315(f)(1) – Transmission to Immunization Registries

Description of Measurement/Metric

This measure will demonstrate the ability to transmit data to immunization registries as required for compliance purposes.

- Numerator: Number of distinct immunization records in the denominator that sent recorded immunizations to an immunization registry.
- Denominator: Number of distinct immunization records in a given month period.

Associated Certification Criteria

§ 170.315 (f)(1) Transmission to Immunization Registries	<i>§170.315(f)(1)(i)</i>
	<i>§170.315(f)(1)(ii)</i>

Justification for selected Measurement/Metric

This measure will provide information on the number of patients within a client's facility whose information is being sent to an immunization registry.

Test Methodology

The denominator will pull directly from the client database based on the parameters identified. The numerator will come from CareConnect tool which facilitates the connection between the EHR and Immunization registry.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient therapy facilities we support and target with this certified product. We will pull data to test over a 30 day time period.

Expected Outcomes

The identified measure will document the percentage of patients at the facility with immunization records being sent to an immunization registry.

§170.315(f)(5) – Transmission to Public Health Agencies - Electronic Case Reporting

Description of measurement/metric

The measure will demonstrate the ability to send electronic case reports to public health agencies.

- Number of CCDs transmitted to AIMS in a given month period

Associated Certification Criteria

§ 170.315 (f)(5) Transmission to public health agencies –electronic case reporting	§170.315(f)(5)
--	----------------

Justification for Selected Measurement/Metric

There are no clients on the TheraOffice certified product sending data to public health agencies for electronic case reporting. For this reason, we will be using testing tools to demonstrate that the capability is present should a client opt to begin sending data to public health agencies.

Test Methodology

We will utilize the AIMS platform to demonstrate our compliance with the certification criteria. And to demonstrate clients have a functioning ability to send electronic case reports to public health agencies should they opt to do so in the future.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the out-patient therapy specialty health care facilities we support and target with this certified product. Testing tools will be utilized to demonstrate compliance.

Expected Outcomes

The measure and use of testing tools will demonstrate compliance with the criteria and the ability to send data should a client ever opt to do so.

§170.315(g)(7) – Application Access – Patient Selection**Description of Measurement/Metric**

This measure will demonstrate utilization of the Certified FHIR R4 resources to search for patients.

- Number of Patient searches conducted using the Certified FHIR R4 Patient endpoint during a 30-day window.

Associated Certification Criteria

§ 170.315 (g)(7) Application Access – Patient Selection	§170.315(g)(7)(i)
	§170.315(g)(7)(ii)

Justification for Measurement/Metric

The Certified FHIR R4 Patient endpoint will provide a variety of search parameters to support identification of a patient for subsequent searches. This measure will demonstrate that the search capability is available and utilized.

Test Methodology

Internal monitoring tools will provide utilization over the specified time period.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient therapy facilities we support and target with this certified product. We will pull data to test over a 30-day time period.

Expected Outcomes

We expect to see within the 30-day period utilization of the Certified FHIR R4 Patient endpoint to search for a patient. The searches will result in a “searchset” Bundle listing all Patients that match the provided criteria. When no matches are found an empty Bundle will be returned to the requestor.

§170.315(g)(9) – Application Access- All Data Request

Description of Measurement/Metric

This measure will demonstrate utilization of the Certified FHIR R4 document reference resource to generate or retrieve CCDs.

- Number of successful CCD retrievals using either the certified CCD or the Certified FHIR R4 DocumentReference endpoints within a 30-day period.

Associated Certification Criteria

§ 170.315 (g)(9) Application Access – All Data Request	<i>§170.315(g)(9)(i)</i>
	<i>§170.315(g)(9)(ii)</i>

Justification for Selected Measurement/Metric

The Certified CCD and the Certified FHIR R4 DocumentReference endpoint will provide a generated CCD upon request based on the supplied parameters. This measure will demonstrate that the capability is available and can be utilized.

Test Methodology

Internal monitoring tools will provide utilization over time.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient therapy facilities we support and target with this certified product. We will pull data to test over a 30-day time period.

Expected Outcomes

We expect to see within the 30-day period utilization of the Certified CCD and/or Certified FHIR R4 DocumentReference endpoints to generate a CCD. The Certified CCD endpoint will provide the generated CCD as XML. The Certified FHIR R4 DocumentReference will provide the CCD as a Base64 encoded string attachment.

§170.315(g)(10) – Standardized API for patient and population services

Description of Measurement/Metric

This measure will demonstrate utilization of the Certified FHIR R4 resources to read data for patients.

- Number of successful requests to the Certified FHIR R4 endpoints excluding Patient and DocumentReference within a 30-day period.

Associated Certification Criteria

§ 170.315 (g)(10) Standardized API for patient and population services	<i>§170.315(g)(10)(i)</i>
	<i>§170.315(g)(10)(ii)</i>
	<i>§170.315(g)(10)(iii)</i>
	<i>§170.315(g)(10)(iv)</i>
	<i>§170.315(g)(10)(v)</i>
	<i>§170.315(g)(10)(vi)</i>
	<i>§170.315(g)(10)(vii)</i>
	<i>§170.315(g)(10)(viii)</i>

Justification for selected Measurement/Metric

The Certified FHIR R4 endpoints will provide patient data upon request based on selected resource and the supplied parameters. This measure will demonstrate that the capability is available and utilized.

Test Methodology

Internal monitoring tools will provide utilization over the specified time period.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient therapy facilities we support and target with this certified product. We will pull data to test over a 30-day time period.

Expected Outcomes

We expect to see within the 30-day period utilization of the Certified FHIR R4 endpoints to read or search for patient data of the following resource types:

- Capability Statement
- Patient
- AllergyIntolerance
- CarePlan
- CareTeam
- Condition
- ImplantableDevice
- DiagnosticReport
- DocumentReference
- Goal
- Immunization
- MedicationRequest
- Observation
- Procedure
- Encounter
- Organization
- Practitioner
- Provenance
- ClinicalNotes
- MissingData

§170.315(h)(1) – Direct Project**Description of Measurement/Metric**

This measure will demonstrate the ability to send and receive direct project messages.

- Number of XDR/XDM direct message sent and received by type within a 30-day period

Associated Certification Criteria

§ 170.315 (h)(1) Direct Project	§170.315(h)(1)(i)
	§170.315(h)(1)(ii)

Justification for Selected Measurement/Metric

This measure will demonstrate the types of messages that are supported for direct messaging.

Test Methodology

Logs will be reviewed to determine the frequency and the transport mechanism used by providers for sending/receiving transitions of care using Edge protocols. Log files obtained during Real World Testing will be de-identified and used for analysis in several areas to validate the proper operation of the transport mechanisms and input for the calculation of the measure on the specific types of transport mechanisms used. This test methodology will primarily test the conformance of the implementation.

Care Setting(s)

Care Setting	Justification
Out-patient therapy specialty setting	This measure was designed to test the Out-patient therapy facilities we support and target with this certified product. We will pull data over a 30-day period.

Expected Outcomes

We expect to see messages successfully sent and received of the following types during the reporting window:

- Message
- Notification
- Referral
- Referral Response

Attestation

This Real World Testing plan is complete with all required elements, including measures that address all certification criteria and care settings. All information in this plan is up to date and fully addresses the Health IT Developer's Real World Testing requirements.
