Bells AI
Digital Assistant

CAPABILITIES

Assisted Data Capture
Helps you transition from mobile to desktop seamlessly. Provides templates, typed notes, photos, voice to text and other intuitive features.

Data Accuracy
Assists with contextual recommendations for compliance and reimbursement. Helps with proofing grammar, spelling, checking clinical vocabulary, leveraging the user dictionary and fast-checking treatment notes.

Recommendation Engine
Provides clinical support by setting up contextual keywords, includes must-have blocks of text and optimizes billing codes.

Care Team Tags
Allows quick tags of care team members in the session note to reference in future sessions.

SKILLS

- Session planning
- Session data capture
- Documentation and accuracy
- Payroll savings
- Faster cash flow
- Improved ramp time

RECOMMENDATIONS

"Bells is user friendly and assists with submitting notes in a timely manner."

"This saves me an hour each day!"
