

Helping you provide quality care for all types of addiction treatment

myAvatarAM: The EHR for addiction treatment

myAvatarAM is an integrated, web-based electronic health record (EHR) designed to meet the clinical needs of organizations providing medication-assisted treatment (MAT) programs. Addiction management tools, such as electronic ordering, e-Prescribing and dispensing of multiple medications — as well as automatic inventory updates, consumer enrollment and tracking — simplify reporting and enhance client safety. As a result, organizations can focus on providing care and improving outcomes.

Key benefits

- Automates medication dispensing at rates faster than industry standards, often in less than 15 seconds, which decreases wait times and improves consumer experience
- Allows for electronic ordering and e-Prescribing
- Helps organizations maintain compliance with regulatory entities because of dispensing and inventory controls
- Provides real-time analytics and reporting, so clinicians can provide the right care at the right time
- Reduces individual wait times with dosing queue management system
- Supports flexible, value-based reimbursements today and in the future
- Advances care coordination and integration

Key clinical features

- Real-time access to a person's record, from the office or the field
- Tracking and analysis of quality measures through data collection and reporting
- Clinical documentation and procedures supporting evidence-based programs
- Real-time clinical and compliance alerts

Key financial features

- Claims generated automatically from clinical data
- Payer and service rules assigned, based on an individual's benefits
- Medicare and Medicaid complex billing requirements made simple
- Consumer portal for credit card payments and consumer engagement

With Netsmart solutions, you can rest easier at night, knowing your technology won't become obsolete tomorrow. We develop technology for where healthcare is going — not simply for where it is today. And that is ultimately why clients choose Netsmart.
