

## myEvolv: The EHR for I/DD Services

myEvolv® is a fully web-based, ONC-certified electronic health record (EHR) solution with unique features for organizations that provide services for people diagnosed with intellectual and developmental disabilities. In addition to managing specialized programs, such as supported employment and day habilitation, it also offers comprehensive case management, billing and financial features.

### Key Features

#### Case Management

- Supports the “Golden Thread of Documentation” allowing information to flow from individual support plans to program plans and documentation
- Provides automated workflows and scheduling to ensure program and regulatory compliance
- Allows mobile documentation of participation during community-based activities
- Tracks and links mileage and travel time

#### Operational

- Service effectiveness can be tracked by individual, staff member, program and agency as a whole
- Reporting and data collection for interconnected measures simplify transition to performance-based care models
- Data collection and reporting features allow tracking and analysis of critical measurements

### Intuitive Financial and Billing Features

- Automatically creates claims from notes and placement data
- Determines the appropriate payer rate based on the individual’s coordination of benefits
- Supports the complex billing requirements of Medicare and state Medicaid
- Real-time authorization threshold alerts mean better budget management
