

Simplify the Check-in Process

myHealthPointe™ Kiosk is a cost-effective, convenient solution that streamlines processes and engages consumers in their care the moment they arrive at your clinic. The solution digitizes check-in, integrates with the electronic health record (EHR) and improves client engagement at the point of care.

Key Features

- Integrates seamlessly with Netsmart EHRs
- Reduces check-in time and standardizes information gathered
- Allows consumers to complete assessments and health screenings, offering real-time results to clinicians
- Reduces wait times and allows staff to focus on consumers instead of paperwork
- HIPAA-compliant to protect sensitive information
- Increases privacy and improves forms management

BENEFITS

Self Service Improves Check-in and Increases Satisfaction

myHealthPointe Kiosk allows consumers to check in using an iPad, complete assessments and update personal information.

Here's how your organization and the people you serve benefit:

- Standardized check-in procedures provide better data and reduce administrative tasks
- Assessments and screeners completed prior to appointments can be incorporated into the EHR and viewed immediately by clinicians
- Reduced wait times improve the consumer experience

HIPAA compliant

Paperless check-in and documentation protect consumer privacy
